

Pearl Chemicals Limited – Key Products

ACETIC ACID 80% TECH

Textiles, pigment and dye production.

ALUMINIUM CHLORIDE 50% SOLUTION

Effluent treatment, manufacture of pigment and dyes. Catalyst in road / water proofing mixtures.

AMMONIUM PERSULPHATE

Bleaching / oxidising agent. Electroplating.

ALUMINIUM SULPHATE

Water treatment coagulant. Paper sizing agent.

BENZOTRIAZOLE

Industrial corrosion inhibitor, water stabiliser, oil antioxidant, chemical precursor.

CAUSTIC SODA

Used in industries such as: pulp and paper, textiles, soaps and detergents, bleach manufacturing, petroleum products, aluminium and the Chemical Processing Industry.

DIPICOLINIC ACID

Used in the production of pharmaceutical and food additive products.

HYDROCHLORIC ACID

Pickling, cleaning etc.

OXALIC ACID

Used in waste water treatment for removing calcium from water. Rust remover for metal treatment. Bleaching agent in textiles, wood and pulp. Purifying agent in pharmaceutical industries especially in antibiotic medication.

PERACETIC ACID

Hygiene sterilisation in breweries, dairies and food areas, also water treatment, bleaching of paper, pulp textiles, oils and fats. Epoxy resins and Epoxides.

PHOSPHATES

Sodium Hexametaphosphate, Sodium Tripolyphosphate, Tetra Potassium Pyrophosphate and many more overleaf.

PHOSPHORIC ACID

The substance is used in rust processes, in decaling preparations, also in soft drinks such as colas and in many industrial processes.

SODIUM ACETATE ANHYDROUS

Food buffer, chemical synthesis, metal finishing chemicals, de-icer.

SODIUM ACETATE TRIHYDRATE / HYDRATE

Buffer in pigment and dyestuffs manufacture, also textiles and dyes, photography and metal finishing chemicals.

SODIUM BROMATE

Chemical synthesis, textile auxiliaries, analytical reagent, hair preparation.

SODIUM BROMIDE

Photography, water treatment chemicals and general chemical formulators.

SODIUM METABISULPHITE – TECHNICAL GRADE & FOOD GRADE

Water treatment. Beer brewing and wine fermentation. Food preservative.

SODIUM MOLYBDATE

Water treatment, metal finishing, pigment and dye production fertilizers, and trace element for agricultural products.

SULPHURIC ACID 96%

Chemical reactions, pickling etc.

WE OFFER SOLUTIONS OF MOST SOLID PRODUCTS, ALSO TOLL MANUFACTURING, REPACKING, GRINDING, BLENDING ETC., AND THE PURCHASE OF SURPLUS CHEMICAL STOCK.

Whitebridge Estate, Whitebridge Lane, Stone, Staffordshire, ST15 8LQ. Tel: 01785 819747 Fax: 01785 811567
